# INDEX OF VOLUME 29, 1991

**NUMBER 1, JANUARY—FEBRUARY 1991**

**Stack the Deck in Your Favor,** by Jay H. Lehr, pp. 2-3.

**Mapping Zones of Contaminated Ground-Water Discharge Using Creek-Bottom-Sediment Vapor Samplers, Aberdeen Proving Ground, Maryland,** by D. A. Vroblesky, M. M. Lorah & S. P. Trimble, pp. 7-12.

**Applications of Forward Modeling Resistivity Profiles,** by F. Radstake, W. Geirnaert, T. W. Kleinendorst & J. C. Terhell, pp. 13-17.

**On a One-Dimensional Tracer Model,** by Heqing Huang, pp. 18-20.

**Modeling Solute Transport in Ground Water At or Near Freezing,** by M. D. Zukowski & M. A. Tumeo, pp. 21-25.

**Estimating Recharge Rates Through Unsaturated Glacial Till by Tritium Tracing,** by D. P. Daniels, S. J. Fritz & D. I. Leap, pp. 26-34.

**"Where's the Benzene?" — Examining California Ground-Water Quality Surveys,** by P. W. Hadley & R. Armstrong, pp. 35-40.

**Simple Derivation of the Retardation Equation and Application to Preferential Flow and Macrodispersion,** by Herman Bouwer, pp. 41-46.

**Aqueous Geochemistry of the Sand-and-Gravel Aquifer, Northwest Florida,** by B. G. Katz & A. F. Choquette, pp. 47-55.

**Assessment of Porous Media Heterogeneity by Inverse Plume Analysis,** by E. P. Poeter & W. R. Belcher, pp. 56-62.

**Particle Tracking Analysis of Recharge Areas on Long Island, New York,** by H. T. Buxton, T. E. Reilly, D. W. Pollock & D. A. Smolensky, pp. 63-71.

**Ground-Water Discharge to Lakes: Focusing in Embayments,** by D. S. Cherkauer & P. F. McKereghan, pp. 72-80.

**Ground-Water Contamination from Two Small Septic Systems on Sand Aquifers,** by W. D. Robertson, J. A. Cherry & E. A. Sudicky, pp. 82-92.

**Numerical Simulation of Subsurface-Water Rise in Kuwait City,** by L. Hamdan & A. Mukhopadhyay, pp. 93-104.

**NUMBER 2, MARCH—APRIL 1991**

**The Scientific Process, Part III: Publishing Pollution,** by Jay H. Lehr, pp. 162-166.

**The Peer Review System According to *Ground Water,*** by Jay H. Lehr, pp. 167-168.

**A Method for Estimating Effective Porosity and Ground-Water Velocity,** by S. H. Hall, S. P. Luttrell & W. E. Cronin, pp. 171-174.

**Estimation of Hydraulic Conductivity Values in a Coastal Aquifer,** by A. Pandit, C. C. El-Khazen & S. P. Sivaramapillai, pp. 175-180.

**Aquifer Parameters from Constant Discharge Nonsteady-Leaky Type Curves,** by Louis H. Motz, pp. 181-185.

**Hydrogeology of Effluent Disposal Zones, Floridan Aquifer, South Florida,** by Joseph L. Haberfeld, pp. 186-190.

**Multilayer Sampling in the Water-Table Region of a Sandy Aquifer,** by E. Kaplan, S. Banerjee, D. Ronen, M. Magaritz, A. Machlin, M. Sosnow & E. Kogiin, pp. 191-198.

**Literature Review and Model (COMET) for Colloid/Metals Transport in Porous Media,** by W. B. Mills, S. Liu and F. K. Fong, pp. 199-208.

**Complex Aquifer-Aquitard Relationships at an Appalachian Plateau Site,** by Jeffrey R. Peffer, pp. 209-217.

**Numerical Assessment of a Landfill Compliance Limit,** by B. R. Hensel, D. A. Keefer, R. A. Griffin & R. C. Berg, pp. 218-224.

**Persistence of Selected Pesticides in Ground-Water Samples,** by T. C. Cavalier, T. L. Lavy & J. D. Mattice, pp. 225-231.

**Impact of the Proposed Qattara Reservoir on the Moghra Aquifer of Northwestern Egypt,** by Z. S. Rizk & A. D. Davis, pp. 232-238.

**A Field Evaluation of In-Situ Biodegradation of Chlorinated Ethenes: Part 3, Studies of Competitive Inhibition,** by L. Semprini, G. D. Hopkins, P. V. Roberts, D. Grbic-Galic & P. L. McCarty, pp. 239-250.

**Model for Predicting Virus Movement Through Soils,** by U. S. Tim & S. Mostaghimi, pp. 251-259.

**Laboratory Column Measurement of VOC Retardation Factors and Comparison with Field Values,** by M. W. Priddle & R. E. Jackson, pp. 260-266.

**Computer Notes — A Douglas-Jones Predictor-Corrector Program for Simulating One-Dimensional Unsaturated Flow in Soil,** by C. Babajimopoulos, pp. 267-270.

**NUMBER 3, MAY—JUNE 1991**

**South Dakota Is the Answer, What Is the Question?** by Jay H. Lehr, pp. 322-326.

**More on the Peer Review Process According to *Ground Water,*** by Jay H. Lehr, pp. 327-330.

**Prospecting for Zones of Contaminated Ground-Water Discharge to Streams Using Bottom-Sediment Gas Bubbles,** by D. A. Vroblesky & M. M. Lorah, pp. 333-340.

**Characteristics of Rhodamine WT and Fluorescein as Adsorbing Ground-Water Tracers,** by D. A. Sabatini & T. A. Austin, pp. 341-349.

**Geochemical Evolution in the Cambrian-Ordovician Sandstone Aquifer, Eastern Wisconsin: 1. Major Ion and Radionuclide Distribution,** by T. R. Weaver & J. M. Bahr, pp. 350-356.

**Embedding and Response Matrix Techniques for Maximizing Steady-State Ground-Water Extraction: Computational Comparison,** by R. C. Peralta, H. Azarmnia & S. Takahashi, pp. 357-364.

**Comparison Between Model Simulations and Field Results for In-Situ Biorestoration of Chlorinated Aliphatics: Part 1. Biostimulation of Methanotrophic Bacteria,** by L. Semprini & P. L. McCarty, pp. 365-374.

**Application of Ground-Penetrating-Radar Methods in Hydrogeologic Studies,** by M. Beres, Jr. & F. P. Haeni, pp. 375-386.

**Delineation of Traveltime-Related Capture Areas of Wells Using Analytical Flow Models and Particle-Tracking Analysis,** by E. S. Bair, A. E. Springer & G. S. Roadcap, pp. 387-397.

**Tritium as an Indicator of Ground-Water Age in Central Wisconsin,** by Kenneth R. Bradbury, pp. 398-404.

**The Depth of Fractures and Active Ground-Water Flow in a Clayey Till Plain in Southwestern Ontario,** by W. W. Ruland, J. A. Cherry & S. Feenstra, pp. 405-417.

**Delineation of a Discontinuous Aquitard with Vertical Electrical Soundings, San Bernardino Valley, Southern California,** by W. P. Owen, S. K. Park & T.-C. Lee, pp. 418-424.

**Computer Notes — A Method to Determine the Formation Constants of Leaky Aquifers, and Its Application to Pumping Test Data,** by F. Kohlbeck & A. Alvarez, pp. 425-429.

**Field Reports — A Method for Installing Miniature Multilevel Sampling Wells,** by W. Stites & W. Chambers, pp. 430-432.

**NUMBER 4, JULY—AUGUST 1991**

**Landfills and Ground-Water Quality,** by G. F. Lee & R. A. Jones, pp. 482-486.

**Acid Neutralization by Gulf Coast Sediments,** by L. E. Fink, W. G. Aubert & W. J. Bernard, pp. 489-494.

**Estimation of Storativity from Recovery Data,** by P. N. Ballukraya & K. K. Sharma, pp. 495-498.

**Interpretation of Pumping from Two-Zone Layered Aquifers Using a Numerical Model,** by K. S. Rathod & K. R. Rushton, pp. 499-509.

**Geochemical Evolution in the Cambrian-Ordovician Sandstone Aquifer, Eastern Wisconsin: 2. Correlation Between Flow Paths and Ground-Water Chemistry,** by T. R. Weaver & J. M. Bahr, pp. 510-515.

**Evaluation of Hydraulic Conductivities Calculated from Multiport-Permeameter Measurements,** by S. H. Wolf, M. A. Celia & K. M. Hess, pp. 516-525.

**Short-Term Plume Containment: Multiobjective Comparison,** by R. C. Peralta & R. L. Ward, pp. 526-535.

**Hydrogeological Decision Analysis: 2. Applications to Ground-Water Contamination,** by J. Massmann, R. A. Freeze, L. Smith, T. Sperling & B. James, pp. 536-548.

**Determining the Mean Hydraulic Gradient of Ground Water Affected by Tidal Fluctuations,** by Michael E. Serfes, pp. 549-555.

**The Effect of Tidal Fluctuation on a Coastal Aquifer in the UK,** by A. D. Erskine, pp. 556-562.

**Statistical Tolerance Limits for Ground-Water Monitoring,** by Robert D. Gibbons, pp. 563-570.

**Effect of Nitrate Addition on Biorestoration of Fuel-Contaminated Aquifer: Field Demonstration,** by S. R. Hutchins, W. C. Downs, J. T. Wilson, G. B. Smith, D. A. Kovacs, D. D. Fine, R. H. Douglass & D. J. Hendrix, pp. 571-580.

**Theoretical Evaluation of Modified Wenner Array for Shallow Resistivity Exploration,** by V. C. Goyal, S. Niwas & P. K. Gupta, pp. 582-586.

**Computer Notes — Capture Zones for Simple Aquifers,** by Carl D. McElwee, pp. 587-590.

**NUMBER 5, SEPTEMBER—OCTOBER 1991**

**Wetlands: A Threatening Issue,** by Jay H. Lehr, pp. 642-645.

**Embedded Knowledge in Software: 1. Description of a System for Contaminant Transport Modeling,** by G. L. McClymont & F. W. Schwartz, pp. 648-654.

**Modeling the Density-Driven Movement of Liquid Wastes in Deep Sloping Aquifers,** by H.-W. Dorgarten & C.-F. Tsang, pp. 655-662.

**Semianalytical Solutions for Radial Dispersion in a Three-Layer Leaky Aquifer System,** by Chia-Shyun Chen, pp. 663-670.

**Geochemical Transformations and Modeling of Two Deep-Well Injected Hazardous Wastes,** by W. R. Roy, B. Seyler, J. D. Steele, S. C. Mravik, D. M. Moore, I. G. Krapac, J. M. Peden & R. A. Griffin, pp. 671-677.

**Subsurface Partitioning of Volatile Organic Compounds: Effects of Temperature and Pore-Water Content,** by H. B. Kerfoot, pp. 678-684.

**Evaluation of Sorption Models in the Simulation of Naphthalene Transport Through Saturated Soils,** by K.-H. Liu, C. G. Enfield & S. C. Mravik, pp. 685-692.

**Influence of Vertical Flow on Ground-Water Transport,** by E. C. Brainard & L. W. Gelhar, pp. 693-701.

**Calibration of a Texture-Based Model of a Ground-Water Flow System, Western San Joaquin Valley, California,** by S. P. Phillips & K. Belitz, pp. 702-715.

**The Behavior of Dense, Nonaqueous Phase Liquids in Fractured Clay and Rock,** by B. H. Kueper & D. B. McWhorter, pp. 716-728.

**Some Additional Nonparametric Prediction Limits for Ground-Water Detection Monitoring at Waste Disposal Facilities,** by Robert D. Gibbons, pp. 729-736.

**Assessment of Uncertainty in Time-Related Capture Zones Using Conditional Simulation of Hydraulic Conductivity,** by M. D. Varljen & J. M. Shafer, pp. 737-748.

**NUMBER 6, NOVEMBER—DECEMBER 1991**

**An Evaluation of Lithium Sorption Isotherms and Their Application to Ground-Water Transport,** by B. D. Newman, H. R. Fuentes & W. L. Polzer, pp. 818-824.

**The Modeling Process and Model Validation,** by Chin-Fu Tsang, pp. 825-831.

**Modeling Variations in Annular Pressure Due to Fluid Injection,** by Fredric C. Arnold, pp. 832-837.

**Analysis of Ground-Water Remedial Alternatives at a Superfund Site,** by C. Zheng, G. D. Bennett & C. B. Andrews, pp. 838-848.

**A Monte Carlo-Based Approach for Determining Traveltime-Related Capture Zones of Wells Using Convex Hulls as Confidence Regions,** by E. S. Bair, C. M. Safreed & E. A. Stasny, pp. 849-855.

**Assessing Transmissivity from Specific Capacity in a Large and Heterogeneous Alluvial Aquifer,** by M. Razack & David Huntley, pp. 856-861.

**Assessing Pesticide Contamination to Ground Water: A Rapid Approach,** by M. Ehteshami, R. C. Peralta, H. Eisele, H. Deer & T. Tindall, pp. 862-868.

**Coincidence of Well Fields and Tectonic Basins in the Precambrian Shield Area of Southeast Botswana,** by E.J.L. Dietvorst, J. J. De Vries & A. Gieske, pp. 869-877.

**Embedded Knowledge in Software: 2. Demonstration and Preliminary Evaluation,** by G. L. McClymont & F. W. Schwartz, pp. 878-884.

**Thermodynamic Framework for Evaluating PAH Degradation in the Subsurface,** by M. F. McFarland & R. C. Sims, pp. 885-896.

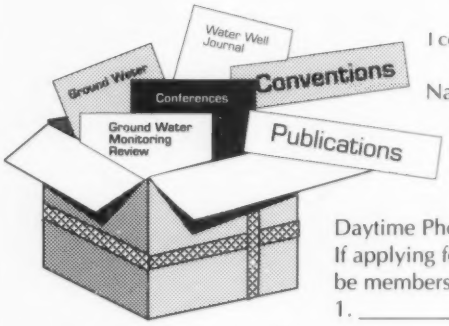
**Multilevel Slug Tests with Comparisons to Tracer Data,** by J. G. Melville, F. J. Molz, O. Güven & M. A. Widdowson, pp. 897-907.

**A Comparison of Sorption Coefficients Determined by Batch, Column, and Box Methods on a Low Organic Carbon Aquifer Material,** by W. G. MacIntyre, T. B. Stauffer & C. P. Antworth, pp. 908-913.

**Field-Scale Investigation of Infiltration Into a Compacted Soil Liner,** by S. V. Panno, B. L. Herzog, K. Cartwright, K. R. Rehfeldt, I. G. Krapac & B. R. Hensel, pp. 914-921.

## We Package Membership

**Application for Membership in the Association of Ground Water Scientists and Engineers,** a division of National Water Well Association



I certify that I am involved in the ground water industry in a technical capacity.

Name _____

Social Security Number _____

Company _____

Address _____

City, State, Zip _____

Daytime Phone (_____)_____ Fax # _____

If applying for company membership, list two additional individuals who will be members under your company's name and address:

1. _____ Social Security # _____

2. _____ Social Security # _____

If applying for student membership, professor's signature _____

Please check appropriate box below (make check payable to NWWA).

| | | | |
|---|---|---|---|
| ❑ Individual | $ 82 | ❑ Full-time student (US,MX,CN) | $ 35* |
| ❑ Company | $124 | ❑ International | $ 97** |
| | | ❑ Company | $139** |

❑ 9- x 12-inch walnut and brass plaque (optional $16)

*Signature of faculty member and copy of Student I.D. must be attached for student membership (must be enrolled and carrying at least 10 credit hours).

**Applicants from outside the U.S., Canada, or Mexico only.

**Mail completed application and check to National Water Well Association, Dept. 017, P.O. Box 182039, Columbus, OH 43218-2039.**
